Brave Adds Generators to Line-Up

5,500-13,000 Watt Industrial Generators Powered by Honda

Rogers, Minn. – January 2018: Brave will now offer four portable generators with wattage ratings from 5,500-13,000 Watts.

All generators are powered by Honda engines and feature digital CDI ignition offering excellent starting and high-power output. Models utilize top of the line, 100% copper wound head with low THD, making it safe to use with sensitive equipment. A full roll cage prevents damage if generator is tipped and solid base prevents grass, dirt and dust from getting into engine and alternator. Vibration isolation mounts with interlocking anti-rip brackets provide optimal support. An electric start model with GFCI outlet is available. Optional wheel kits to fit each model are available for convenient portability.

Brave's generator line-up is perfect for construction or industrial applications.

About Brave

Brave manufactures high-quality, outdoor power equipment for direct distribution and distribution through a network of dealers, rental stores, big-box stores, national accounts and hardware co-ops nationwide. Top quality Brave log splitters have been available since 1982. Brave has since expanded its line-up to also include hot and cold water pressure washers, earth augers, generators, hydraulic power packs, trenchers and pumps.
